

Hossein MohammadiPour

Software Engineer - Node.js Developer

+46 733094215 | me@hossein.link | [linkedin.com/in/hosseinDotLink](https://www.linkedin.com/in/hosseinDotLink) | github.com/hosseinDotLink

Summary

Currently working as a back-end developer at PinMeTo AB. Writing computer apps for over 6 years and specialising in Back-End development for over 3 years. Super-nerd who enjoys customising the development environment and loves JavaScript, unit testing and GNU/Linux. Interested in devising a better solving method for challenging tasks and learning the latest technologies and tools as needed.

EXPERIENCE

PinMeTo – Malmö, Sweden

Software Developer

Sep 2022 – Present

- Onboarding and starting ::)

Sell Staged – London, United Kingdom

Node.js Developer

Aug 2021 – Aug 2022

- Communicated with 5 teams to develop and implement programs in 3 different countries (Australia, the United Kingdom, and Iran).
- My favorite project is [Safegram](#), which uses blockchain technology to ensure the safe transfer of large amounts of money around the globe.
- Increased response speed (200%) by making changes to the database schema and adding Redis to cache emergency information.

Projects:

1. [Safegram](#): Sending money to over 200 countries & territories through the mobile app or online payable with crypto-currencies / Node.js - Express JS - MongoDB - Redis - azure-server - CoinPayments - gitlab CI/CD
2. [Qikr](#): Online taxi service in London / Node.js - Express JS - MongoDB - Redis - azure-server - Stripe payment - Microservices - Socket.io
3. [Jiffy-App](#): Supermarket in Sydney of Australia / Node.js - Express JS - MongoDB - azure-server - Braintree payment - Twilio
4. [Youthhood 2 Adulthood \(Y2A\)](#): Platform that intended to educate and empower young people ages 15 to 25 within the UK. / Node.js - Express JS - MongoDB - Redis - azure-server - Stripe payment
5. [POT](#): POT is a football analysis and prediction application / Node.js - Express JS - MongoDB - Redis - azure-server - Docker

AI Yasin holding – Tehran, Iran

Node.js Developer

Dec 2020 – Aug 2021

- Surveyed more than 1500 businesses in T to find a better user experience in accessing and finding them.
- Participate in AGILE project methodology and conform to coding standards including git workflow and code reviews.

Karina Pars – Mashhad, Iran

Back-End Developer (Django, flask, and Node.js)

Jan 2018 – Oct 2019

- Development of basic payment gateway infrastructure with higher speed, security, and accuracy.
- 33% increase in company resources due to payment gateway performance.

Freelancer

Sep 2016 – Mar 2018

Last update: 29 Jan 2022

- Design or develop software systems with different languages and technologies (environments and frameworks).
- Advised customers about or performed maintenance on software systems.
- Learned Back-End technologies and system architectures.

Aria khorshid – Mashhad, Iran

Electronic Components Developer

Sep 2015 – Sep 2016

- Learned how to develop microcontrollers, such as the AVR or Atmega series, and make LED scrolling/fixed panels.

EDUCATION

Bachelor of Computer Engineering – University of Torbat Heydarieh, Iran

2015 - 2019

Skills

JavaScript - Typescript - Node.js - Express JS - NoSQL/SQL based databases - Basics of Front-End development - git - gitlab CI/CD - Software architectures and Design patterns - TDD - Agile
